

NEXSPAN2™

F SERIES & H SERIES

NEXSPAN2™

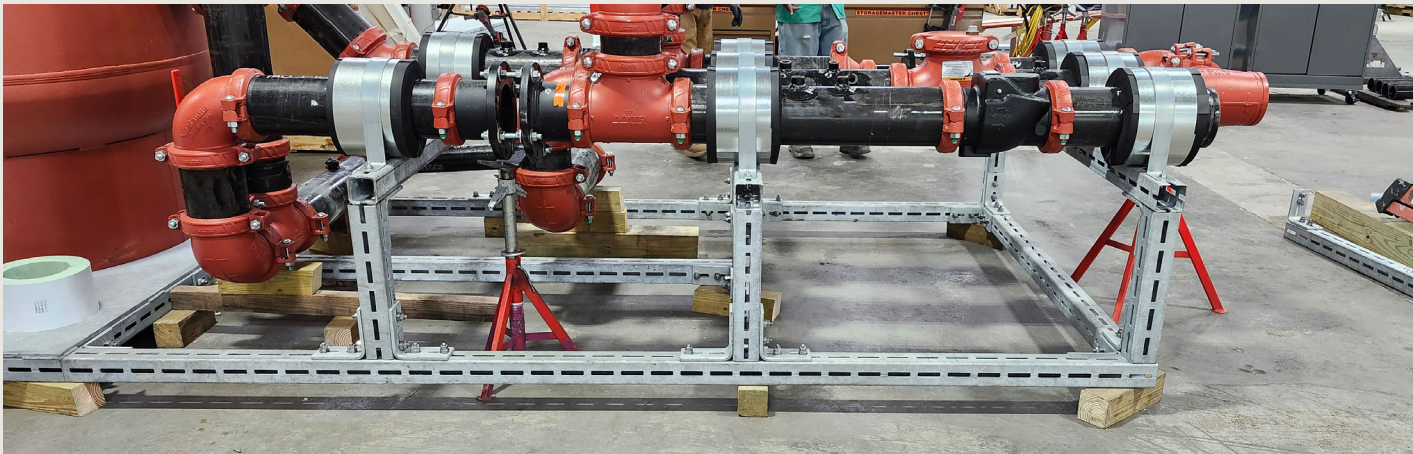

F SERIES & H SERIES

Designed for durability and precision, Allfasteners NexSpan2™ delivers a smarter approach to framing and support structures. The F Series is designed for modular framing systems, while the H Series is better for overhead applications.

TANK & PUMP SKIDS F SERIES

NexSpan2™ F Series provides a durable, modular framing solution ideal for **pump and tank skid** assemblies. Its precision-engineered design allows for easy integration, fast installation, and reliable support in demanding industrial environments.

UNIT STANDS F SERIES

Ideal for unit stands, offering a durable and modular framing system that supports heavy equipment with precision and stability. Its bolt-together design ensures fast installation and easy adjustments on-site, saving time without sacrificing strength.

PIPE SUPPORTS

F SERIES

An excellent choice for pipe and rooftop pipe supports, providing a strong, adjustable framework that can handle varying loads and configurations. Its corrosion-resistant finish and modular design make it reliable for long-term performance in both indoor and outdoor environments.

FRAMING APPLICATIONS

F SERIES

Perfect for framing applications such as platforms and stairs, offering a versatile and sturdy system that ensures structural integrity and ease of assembly. Its modular components allow for quick customization to meet specific project layouts and load requirements.

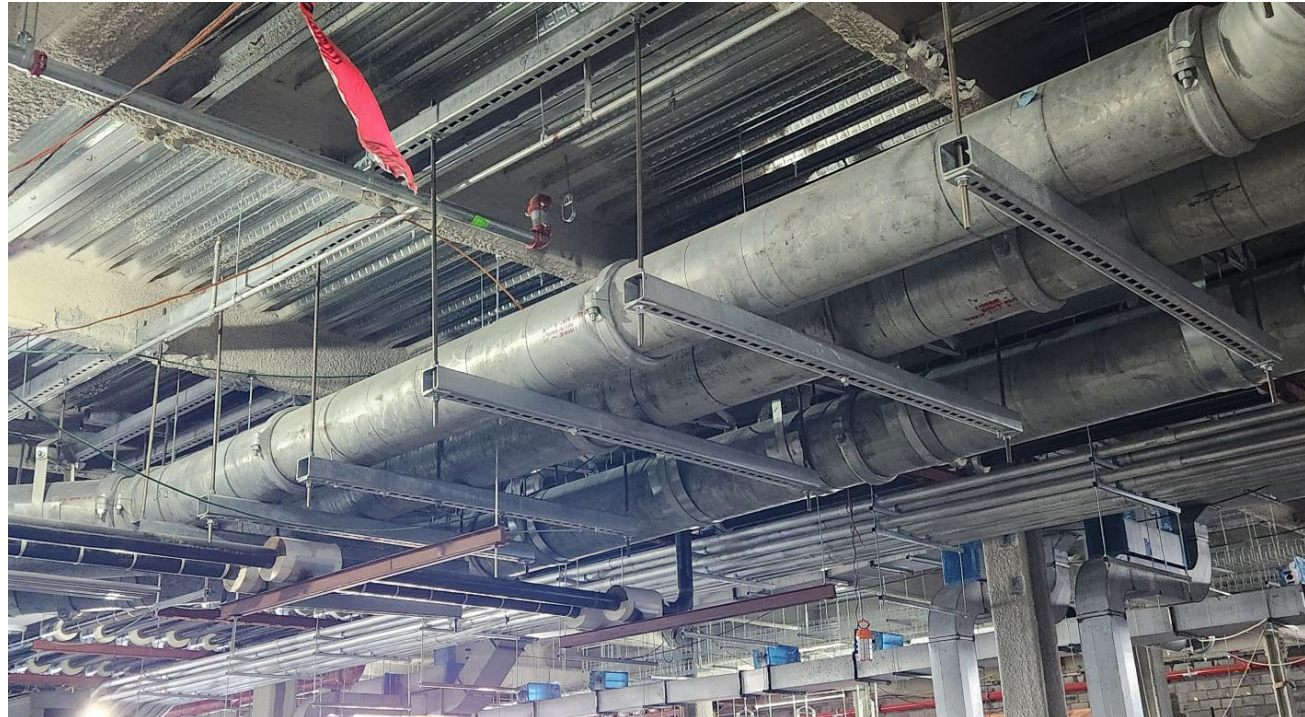

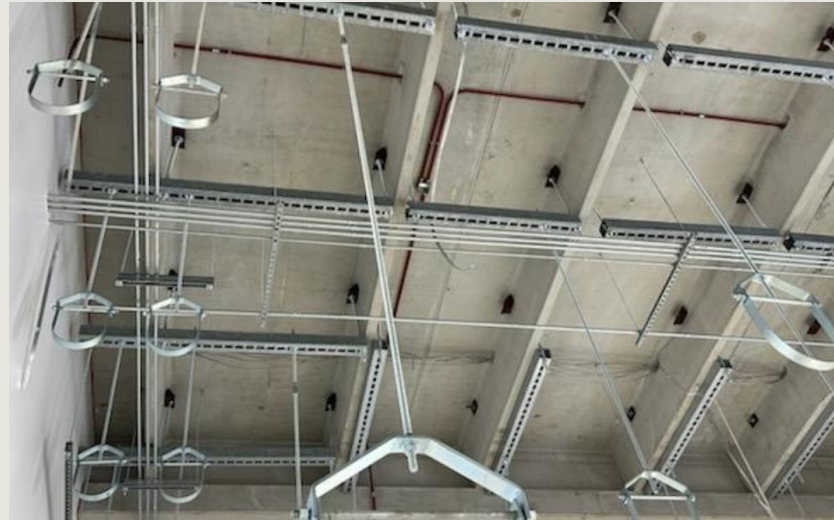

TRAPEZE APPLICATIONS

H SERIES

H Series is ideal for trapeze applications, providing a high-strength, lightweight framing solution that simplifies multi-service support installations. Its adjustable, bolt-together design allows for quick alignment and secure mounting of mechanical, electrical, and plumbing systems.

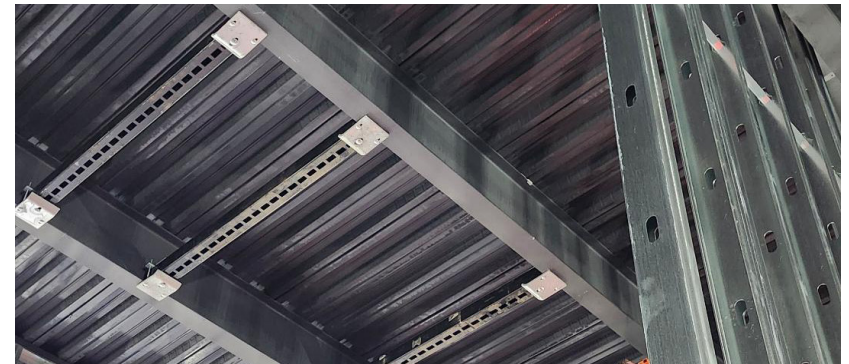

SUPPLEMENTAL STEEL H SERIES

An excellent option for supplemental steel, offering a reliable and adaptable framing system that enhances structural support without the need for custom welding. Its modular design allows for quick installation and integration with existing building steel, saving both time and labor on-site.
